[The Nine Waves of Creation](#) Nov 13 2019 A guide to aligning your life with the frequencies of the Nine Waves of Creation • Explains the quantum physics behind the Waves of the Mayan Calendar system and how their holograms shape the human mind • Shows how throughout history each revolution in human consciousness has been driven by the activation of one of the Nine Waves of Creation • Reveals how we can consciously work to deactivate the negative patterns of the Sixth Wave and manifest the unity consciousness of the Ninth Wave In the past few years the world has witnessed changes in social consciousness whose sudden development the ruling scientific paradigm has not been able to explain. These changes correspond with the activation of new Waves of Creation emanating from the center of the universe that influence human thinking. From the Big Bang to the present, these Waves guide the evolution of the universe and, through their holographic resonance with the human mind, profoundly shape revolutions in religion, technology, economy, and social consciousness. Presenting a quantum-holographic perspective on world history and human consciousness, Carl Calleman explains the quantum physics behind the Waves of the Mayan Calendar system and how these Waves allow us to understand the shifting eras on Earth as well as the possibilities of the future. He describes how, prior to the activation of the 6th Wave in 3115 BCE, our social systems were based on a unified cosmic order, but the hologram of this Wave shifted society to an all-consuming focus on Good and Evil, leading to the rise of patriarchal religious structures, slavery, and warfare. He explores how later Waves and their new holograms helped humanity survive the negative effects of the 6th Wave, such as the Industrial Revolution of the 7th Wave and the Digital Revolution of the 8th Wave. In 2011, the 9th Wave was activated, bringing with it an accelerated push for a more egalitarian world, a rising awareness of unity consciousness, and access to the full power of all Nine Waves of Creation. Calleman explains how our individual resonance with each Wave plays a role in the quality of our lives and how we must consciously work to resonate with the higher Waves. Revealing how we can become quantum activists in a holographic world by aligning with the 9th Wave, the author shows how we each can help manifest the destiny of humanity hinted at in ancient texts.

Living Mythos Dec 15 2019 As we consider the unfolding conditions of our lives through a mythological filter, archetypal qualities of behavior recognizably manifest. This empowers us to infuse value and meaning into our lives that are relevant to our personal experience. Nietzsche understood this process to be essential in the development of his Overman. Carl Jung called this process of bringing unconscious qualities of behavior into consciousness, individuation. Building on the structure of elementary ideasthe universal symbolism that transcends cultural and spiritual landscapes *Living Mythos* presents a compelling alternative to the dependency doctrines of modern tradition, and it inspires us to imagine a tomorrow in which we have reclaimed the spiritual nature of our thoughts. Through an exploration of Norse mythology and the influence of Indo-European shamanism, we may begin to understand the mythological worldview as a form of ancient psychology, designed to awaken us to our inherent potential to create and become our own unique living mythos.

The Fundamentals of Human Factors Design for Volunteered Geographic Information Feb 15 2020 This book explores the roles in which volunteered and professional information play within neogeography from a human factors perspective. The unique advantages of each information type are considered alongside how they may be utilised to create products and services delivering highly functional, efficient and satisfying experiences to their users. The overall aim of this book is to address the issue of how Volunteered Geographic Information (VGI) can be combined with Professional Geographic Information (PGI) to satisfy the information search requirements of consumer-users via highly usable mashups. Firstly, this required the development of an understanding of the way different users perceive VGI and PGI in terms of its benefits to their activities and information needs. Secondly, the benefits that VGI may bring to the user experience of a mashup (which cannot be attained through the use of PGI) needed to be understood. In order to achieve this, a user centred design perspective was implemented throughout the research.

Artificial Chemistries Oct 25 2020 An introduction to the fundamental concepts of the emerging field of Artificial Chemistries, covering both theory and practical applications. The field of Artificial Life (ALife) is now firmly established in the scientific world, but it has yet to achieve one of its original goals: an understanding of the emergence of life on Earth. The new field of Artificial Chemistries draws from chemistry, biology, computer science, mathematics, and other disciplines to work toward

that goal. For if, as it has been argued, life emerged from primitive, prebiotic forms of self-organization, then studying models of chemical reaction systems could bring ALife closer to understanding the origins of life. In Artificial Chemistries (ACs), the emphasis is on creating new interactions rather than new materials. The results can be found both in the virtual world, in certain multiagent systems, and in the physical world, in new (artificial) reaction systems. This book offers an introduction to the fundamental concepts of ACs, covering both theory and practical applications. After a general overview of the field and its methodology, the book reviews important aspects of biology, including basic mechanisms of evolution; discusses examples of ACs drawn from the literature; considers fundamental questions of how order can emerge, emphasizing the concept of chemical organization (a closed and self-maintaining set of chemicals); and surveys a range of applications, which include computing, systems modeling in biology, and synthetic life. An appendix provides a Python toolkit for implementing ACs.

The Future of Personal Information Management, Part I Jan 16 2020 We are well into a second age of digital information. Our information is moving from the desktop to the laptop to the "palmtop" and up into an amorphous cloud on the Web. How can one manage both the challenges and opportunities of this new world of digital information? What does the future hold? This book provides an important update on the rapidly expanding field of personal information management (PIM). Part I (Always and Forever) introduces the essentials of PIM. Information is personal for many reasons. It's the information on our hard drives we couldn't bear to lose. It's the information about us that we don't want to share. It's the distracting information demanding our attention even as we try to do something else. It's the information we don't know about but need to. Through PIM, we control personal information. We integrate information into our lives in useful ways. We make it "ours." With basics established, Part I proceeds to explore a critical interplay between personal information "always" at hand through mobile devices and "forever" on the Web. How does information stay "ours" in such a world? Part II (Building Places of Our Own for Digital Information) will be available in the Summer of 2012, and will consist of the following chapters: Chapter 5. Technologies to eliminate PIM?: We have seen astonishing advances in the technologies of information management -- in particular, to aid in the storing, structuring and searching of information. These technologies will certainly change the way we do PIM; will they eliminate the need for PIM altogether? Chapter 6. GIM and the social fabric of PIM: We don't (and shouldn't) manage our information in isolation. Group information management (GIM) -- especially the kind practiced more informally in households and smaller project teams -- goes hand in glove with good PIM. Chapter 7. PIM by design: Methodologies, principles, questions and considerations as we seek to understand PIM better and to build PIM into our tools, techniques and training. Chapter 8. To each of us, our own.: Just as we must each be a student of our own practice of PIM, we must also be a designer of this practice. This concluding chapter looks at tips, traps and tradeoffs as we work to build a practice of PIM and "places" of our own for personal information. Table of Contents: A New Age of Information / The Basics of PIM / Our Information, Always at Hand / Our Information, Forever on the Web
