Vietnam and the South China Sea Apr 11 2022 Studies of the escalating tensions and competing claims in the South China Sea overwhelmingly focus on China and its increasingly assertive approach, while the position of the other claimants is overlooked. This book focuses on the attitude of Vietnam towards the South China Sea dispute. It examines the position from a historical perspective, shows how Vietnam's position is affected by its wish to maintain good relations with China on a range of issues, and outlines how Vietnam has occasionally made overtures to both the United States and Japan in order to bolster its position, and considered the possibility, so far resisted, of taking China to formal arbitration under the auspices of the United Nations Convention on the Law of the Sea. The book concludes by assessing the future prospects for Vietnam's position in the dispute.

Elbridge Durbrow's War in Vietnam Aug 03 2021 Elbridge Durbrow served as the third United States ambassador to the Republic of Vietnam from 1957 to 1961. His relationships with Vietnamese president Ngo Đình Diệm and members of the Military Assistance Advisory Group in Saigon helped to shape his tenure in office, which ultimately concluded with his decision to end his support for the Vietnamese leader as well as turn away from the American military representatives who had earned Ngo Đình Diệm's trust. This triangular relationship was mired in clashes of ego and personality that often interfered with the American decision making process. Durbrow and his embassy staff, rather than work with the Vietnamese leadership, chose to focus on the negative and reported to Washington only those items that reinforced this perspective. They created an atmosphere of distrust and anxiety that neither the Americans nor Vietnamese could overcome in the 1960s and helped to create the conditions for greater United States involvement in Southeast Asia.

Sociolinguistics of Style and Social Class in Contemporary Athens Jun 13 2022 This ethnographic study deals with the ways people in Athens, Greece, use style to construct their social class identities. Including a rich dataset comprising ethnographic interviews with actual people who live in the stereotypically seen as leafy and posh northern suburbs and in the stereotypically treated as working class western suburbs of Athens coupled with data from popular literary novels, TV series and Greek hip hop music, it argues that the relationship between style and social class identity is mediated by complex social meanings encompassing features from and discourses relevant to both areas, which are structured across different orders of indexicality depending on the genre of speech in which they are created. As such, it will be of interest to scholars in sociolinguistics, discourse analysis, anthropology, sociology, Modern Greek studies, and to everyone who is interested in how social class is constructed via language.

Transcultural Voices Jul 14 2022 This book presents the narratives and voices of young, mostly male practitioners of hip hop culture in Delhi, India. The author suggests that

practitioners understand hip hop as both a thing that can be appropriated and authenticated, made real, in the local and global context and as a way that enables them to transform their lives and futures in the rapidly globalising urban environments of Delhi. The dancers, artists, musicians and cultural theorists that feature in this book construct a multitude of voices in their narratives to formulate their 'own' transcultural voices within global hip hop. Through a combination of linguistic ethnography, sociolinguistics and discourse studies, the book addresses issues including gender and sexuality, identity construction and global culture.

Asian Transformations Oct 25 2020 Gunnar Myrdal published his magnum opus, Asian Drama: An Inquiry into the Poverty of Nations, in 1968. He was deeply pessimistic about development prospects in Asia. The fifty years since then have witnessed a remarkable social and economic transformation in Asia - even if it has been uneven across countries and unequal between people - that would have been difficult to imagine, let alone predict at the time. Asian Transformations: An Inquiry into the Development of Nations analyses the fascinating story of economic development in Asia spanning half a century. Asian Transformations sets the stage by discussing the contribution of Gunnar Myrdal to the debate on development then and now and providing a long-term historical perspective on Asia in the world. It then uses cross-country thematic studies on governments, economic openness, agricultural transformation, industrialization, macroeconomics, poverty and inequality, education and health, employment and unemployment, institutions, and nationalisms to analyse processes of change while recognizing the diversity in paths and outcomes. Specific country studies on China, India, Indonesia and Vietnam, and sub-region studies on East Asia, Southeast Asia, and South Asia, further highlight turning points in economic performance and demonstrate factors underlying success or failure. Including in-depth studies by eminent economists and social scientists, Asian Transformations comprehensively examines the phenomenal changes that are transforming economies in Asia and shifting the balance of economic power in the world and reflects on

the future prospects for this continent over the next twenty-five years. It is a cohesive and multi-disciplinary study of a rapidly changing economic landscape, and makes an important contribution to understanding the complexities and processes of development from different perspectives.

Reading Faces and Bodies: Behavioural and Neural Processes Underlying the Understanding of, and Interaction with, Others Oct 13 2019 The aim of this Research Topic was to offer an interdisciplinary forum for researchers interested in the interplay of face, eye gaze, and body perception in the understanding of others, with an emphasis on behavioural and neural processing. The papers included in this topic come from cognitive, neuroscience and social psychology perspectives and shed new light on how facial and body cues interact with each other and with social, ecological and contextual factors (such as for example social identification and group membership) to form a unified representation that can guide our perceptions and responses to other people. Altogether, they provide an up-to-date picture of advances in this fascinating research field.

United Front Jan 28 2021 Conventional wisdom emerging from China and other autocracies claims that single-party legislatures and elections are mutually beneficial for citizens and autocrats. This line of thought reasons that these institutions can serve multiple functions, like constraining political leaders or providing information about citizens. In **United Front**, Paul Schuler challenges these views through his examination of the past and present functioning of the Vietnam National Assembly (VNA), arguing that the legislature's primary role is to signal strength to the public. When active, the critical behavior from delegates in the legislature represents cross fire within the regime rather than genuine citizen feedback. In making these arguments, Schuler counters a growing scholarly trend to see democratic institutions within single-party settings like China and Vietnam as useful for citizens or regime performance. His argument also suggests that there are limits to generating genuinely "consultative authoritarianism" through quasi-democratic institutions. Applying a diverse range of cutting-edge social science methods on a wealth of original data such as legislative speeches, election returns, and surveys, Schuler shows that even in a seemingly vociferous legislature like the VNA, the ultimate purpose of the institution is not to reflect the views of citizens, but rather to signal the regime's

preferences while taking down rivals.

The Human Factors of Fratricide Apr 30 2021 Fratricide has been defined as firing on your own forces, when mistaking them for enemy forces, which results in injury or death. Rates of fratricide incidence have been steadily increasing and the complexity of the contemporary operating environment may lead to a continuation of this trend. Although the majority of research into fratricide has focused on the development of technological decision aids, recent explorations highlight the need to emphasise the social aspects within a socio-technical framework. This book presents and validates, via the use of case studies, a model of teamwork and decision-making factors that are associated with incidents of fratricide. In summary, it offers a review and evaluation of contemporary theoretical perspectives on teamwork and fratricide, as well as a range of accident analysis approaches. A novel theory of fratricide is then presented followed by a new methodology for assessing fratricide. Naturalistic case studies of teams are undertaken in the military domain. These studies illustrate the approach and offer early validation evidence. In closing, the book presents a series of principles designed to reduce the likelihood of fratricide in the future.

Van Nostrand's Scientific Encyclopedia Nov 25 2020

Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia. Large portions of the reference have required comprehensive rewriting and new illustrations. Scores of new topics have been included to create this thoroughly updated eighth edition. The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half-century ago in 1938 Van Nostrand's Scientific Encyclopedia, First Edition, was published and welcomed by educators worldwide at a time

when what we know today as modern science was just getting underway. The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level. A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions. The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives.

A Dialogic Teaching Companion Sep 23 2020 Building on Robin Alexander's landmark Towards Dialogic Teaching, this book shows how and why the dialogic approach has a positive impact on student engagement and learning. It sets out the evidence, examines the underpinning ideas and issues, and offers guidance and resources for the planning, implementation and review of effective dialogic teaching in a wide range of educational settings. Dialogic teaching harnesses the power of talk to engage students' interest, stimulate their thinking, advance their understanding, expand their ideas and build and evaluate argument, empowering them for lifelong learning and for social and democratic engagement. Drawing on extensive published research as well as the high-profile, 5000-student trial and independent evaluation of Alexander's distinctive approach to dialogic teaching in action, this book: Presents the case for treating talk as not merely incidental to teaching and learning

but as an essential tool of education whose exploitation and development require understanding and skill; Explores questions of definition and conceptualisation in the realms of dialogue, argumentation and dialogic teaching, revealing the similarities and differences between the main approaches; Discusses evidence that has enriched the debate about classroom talk in relation to oracy, argumentation, student voice and philosophy for children as well as dialogic teaching itself; Identifies what it is about dialogic teaching that makes a difference to students' thinking, learning and understanding; Presents the author's rationale and framework for dialogic teaching, now completely revised and much expanded; Proposes a professional development strategy for making dialogic teaching happen which, like the framework, has been successfully trialled in schools; Lists resources from others working in the field to support further study and development; Includes an extensive bibliography. Robin Alexander's A Dialogic Teaching Companion, like its popular predecessor Towards Dialogic Teaching, aims to support the work of all those who are interested in the quality of teaching and learning, but especially trainee and serving teachers, teacher educators, school leaders and researchers.

Interpersonal Positioning in English as a Lingua Franca Interactions Oct 17 2022 This book offers a critical reflection on interpersonal positioning across both large- and small-scale contexts and highlights the multi-faceted nature of intercultural communication in today's global world. The volume establishes positioning primarily as the negotiation of interpersonal relationships, and draws on concepts from across disciplines by way of reappraisal before applying them to two specific domains: MMORPGs (Massively Multiplayer Online Role-Playing Games) and private ELF couple interaction. While acknowledging and showcasing the unique features of positioning in these two contexts, Klötzl and Swoboda point to their commonalities by looking at how language and specifically English is used as a communicative resource in lingua franca situations. The book also identifies new directions for future methodological innovations in that it demonstrates how the same interaction can be looked at in methodologically-different ways and how the authors' own positions projected on to such interaction create an integrated tri-partite perspective on the two domains. Shedding light on interpersonal positioning in different contexts and in turn on global communication more generally, this book will be of particular interest to students and researchers in discourse analysis, pragmatics, computer-mediated communication, sociolinguistics, and applied linguistics.
