The muddied jeep flew off the cliff and Chancey floated above questioning if Rake meant to kill her. Chancey Coolidge, a forty something stay-at-home mom, trades in her dream for fame and fortune in exchange for her perception of the American dream. Struggling to be noticed by her husband, she ponders her purpose in life, and volunteers at the Humane Society, hopeful her encounter there will prove to be more fulfilling than her relations with her husband. In search of companionship, she meets Rake, twenty years her junior, and forms a connection she never knew two souls could share. Bonded by their views on life and death, Chancey begins an affair that can only end one way. On the eve of her passing her husband discovers her poetry, revealing her inner most thoughts and feelings. Mortified her secrets are revealed, her journey as an angel flourishes while nine dolls, tucked away in attics, come to life, as symbols of the abuse and torture Chancey experienced as a child. She relives her pain and torment through these dolls and finally realizes what love truly looks like. While her spirit begins to make amends to her husband, the nine dolls become one. It's the little things that turn a good digital product into a great one. With this practical book, you'll learn how to design effective microinteractions: the small details that exist inside and around features. How can users change a setting? How do they turn on mute, or know they have a new email message? Through vivid, real-world examples from today's devices and applications, author Dan Saffer walks you through a microinteraction's essential parts, then shows you how to use them in a mobile app, web widget, and an appliance. You'll quickly discover how microinteractions can change a product from one that's tolerated into one that's treasured. Explore a microinteraction's structure: triggers, rules, feedback, modes, and loops Learn the types of triggers that initiate a microinteraction Create simple rules that define how your microinteraction can be used Help users understand the rules with feedback, using graphics, sounds, and vibrations Use modes to let users set preferences or modify a microinteraction Extend a microinteraction's life with loops, such as "Get data every 30 seconds" "Manhours, labor and material costs for most home improvement work. Includes instructions for doing the work, with helpful illustrations, and tricks and tips from experienced remodelers." The Lifestyle-integrated Functional Exercise (LiFE) program is a way of reducing the risk of falls by integrating balance and strength activities into regular daily tasks. Unloading the dishwasher becomes an opportunity to improve strength. Brushing your teeth becomes an opportunity to improve balance. In the LiFE program, every daily task becomes an opportunity to improve balance and strength. This is a different approach to a traditional program where you would be required to complete a series of exercises a certain number of times a day for a set number of days each week. The participant's manual outlines the principles of the LiFE program and provides detailed descriptions of the strength and balance activities in the program. It shows how the activities can be incorporated into an everyday routine · includes several stories of successful participants in the program. The participant's manual should also be read by therapists and trainers so that they are familiar with the LiFE program in its entirety and can teach it effectively to others. Author Amilya Antonetti's son, David, spent almost half of the first year of his life in and out of the emergency room. After the doctor's efforts to pinpoint the cause of his distress were fruitless, a determined Amilya eventually discovered an unmistakable pattern: Her son became violently ill about two hours after she finished cleaning house. David was having severe, though not uncommon, allergic reactions to ordinary household cleaners. Amilya's attention immediately turned to finding safer yet still effective ways to keep a clean house -- without putting David in the hospital -- which she built into a successful line of natural products.
